Where the Pooled Estimate Comes From
A How much each week contributes to the pooled estimate
Weight in pooled estimate (%)
periods 31-53
27% of weight
periods 54-72
2% of weight
periods 73-75
71% of weight
B Week contributions (95% CI; weeks with ≥0.5% of weight) and block refits
Week contribution (effect per extra self-trade)
Horizontal lines (95% CI, trader-clustered)
Periods 31-53 refit: -21.7 [-23.0, -20.4]
Periods 54-72 refit: -50.8 [-87.4, -14.3]
Periods 73-75 refit: -0.1 [-1.2, 1.0]
Pooled estimate (all weeks): -5.44
Period (one week each; period 31 = 8-14 Jan 2013, period 75 = 12-18 Nov 2013)
